Press Release

Date: September 5th 2019

For release: Immediate release

Nasdaq's Quandl Institutional Data Platform adds Fundamental Crypto Rating and Price Forecasting Data

Blockchain Investments & Co. , a globally active thesis-driven crypto investment management fund and data provider, works with Nasdaq, adding descriptive, rating, correlation, forecasting and sentiment crypto asset data to Nasdaq's Quandl, the leading data platform.

The new data products will enable (institutional) investors greater insights, to make better and more informed decisions and boost their confidence in understanding and investing in this upcoming asset class. Nasdaq's Quandl platform will source the qualitative and quantitative data from Blockchain Investments & Co. , enabling a wide variety of in-depth crypto asset data to support purposes such as research, investment and regulatory, amongst others.

Blockchain Investments & Co. is founded by a former employee of the European Central Bank (ECB) and is a member of INATBA, the International Association for Trusted Blockchain Applications, launched by the European Commission in April, 2019. The company distinguishes itself by taking an in-depth, high-quality, knowledge based approach on the financial aspects & technological fundamentals of crypto and digital assets.

Quandl, owned by Nasdaq, Inc., delivers financial, economic and alternative datasets to over 400,000 users, which include analysts, traders and portfolio managers worldwide. Subscribers will be able to access Blockchain Investments & Co. data in various ways, including via the Quandl API and through tools for Excel, R and Python. This access allows Quandl users deeper insight into the crypto asset landscape.

"We are honoured and delighted to collaborate with Nasdaq on both qualitative and quantitative granular information regarding crypto and digital assets. Bringing knowledge and understanding to this sector is vital for further improving and building the digital economy and will remain relevant for years to come," said Alfred Prevoo, founder and CEO of Blockchain Investments & Co.

Nasdaq's Quandl provides institutional investors such as hedge funds, asset managers and investment banks with financial, economic and other datasets. "Quandl's global large client base, including investment banks, asset managers and hedge funds, and highly flexible platform make them a great institution for us to collaborate with. We are proud to play a contributing role in providing market solutions to our industry, and that includes giving people the information they need to research and invest in crypto and digital assets".

About Nasdaq

Today, NASDAQ, (OTCBB: NDAQ) is the world's largest electronic stock market, listing approximately 3,600 of the world's most innovative companies. It is home to category-defining companies that are leaders across all areas of business including technology, retail, communications, financial services, media and biotechnology industries. NASDAQ's competitive market structure, combined with an extensive portfolio of products and services, attracts today's largest and fastest growing companies. In fact, more companies now list on NASDAQ than all other major U.S. stock markets. NASDAQ is the fastest growing major stock market in the U.S.— and home to over half of the companies traded on the primary U.S. markets.

NASDAQ trades more shares per day than any other U.S. equities market. On NASDAQ, trades are executed through a sophisticated computer and telecommunications network – a system which transmits timely, critical investment information to more than 1.3 million users in 83 countries. NASDAQ is also among the world's best-regulated stock markets, employing sophisticated surveillance systems and regulatory specialists to protect investors and provide a fair and competitive trading environment.
